DELIVERING PRODUCT SOLUTIONS[™]

www.gri-alleset.com

When it comes to underpads, due to the range of limitless applications, it is critical to have a product solution that is not only cost-effective and clinically acceptable but also addresses the multitude of requirements. With this as our catalyst, GRI-Alleaset has developed a comprehensive product solution under a singular branding - Allesorb, a premium product offering that sets the industry standards in fluid control applications and is guaranteed to address your patient care needs.

- **Wicks**

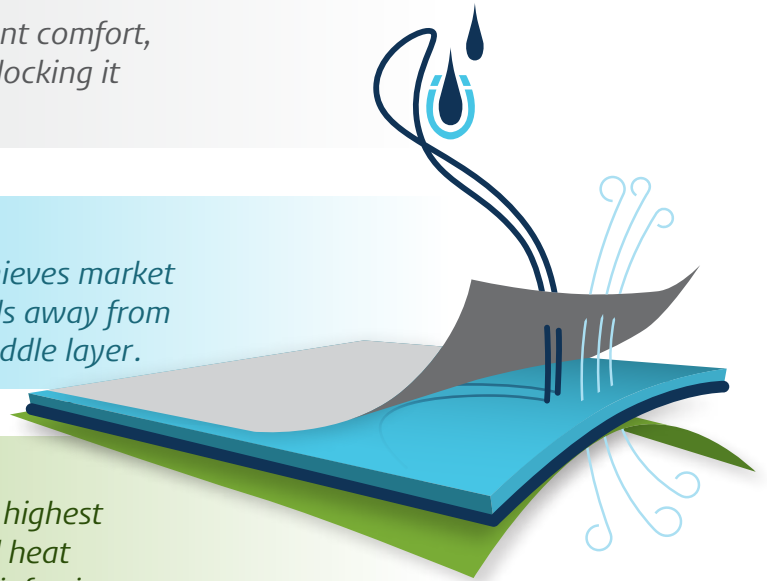

The soft cloth like top layer is designed for patient comfort, swiftly pulling moisture away from the patient, locking it into the super-absorbent Allesorb core.

- **Absorbs**

Allesorb's core technology and construction achieves market leading absorbency and dryness by moving fluids away from the skin, dispersing the fluids throughout the middle layer.

- **Breathes**

Out strong, breathable base layer completes the highest standard in patient care by allowing air flow and heat reduction, reducing the potential for rashes and infections.
